

WORLD'S LEADING MANUFACTURERS OF OVER AND UNDER PRESSURE RELIEVING DEVICES.

ARI ARMATUREN German manufacturer who traditionally produced a broad range of valves designed to provide a "one stop" shop for the Steam and Hot Oil industries, but has now extended their designs to embrace all industries including Chemical and Industrial plants, Shipbuilding and HVAC. With more than 20,000 products available in over 200,000 variations, ARI is most likely to have a solution for all your product and design requirements.

SEETRU British designer and manufacturer of world leading Safety and Relief valves for Compressed Air and Gases, Low Pressure Steam and Refrigeration applications. Seetru also produce Liquid Level Gauges and Sight Glasses for Industry, Chemical Plants and the Shipping industry.

KUNKLE US manufacturer Kunkle was established in 1875 to produce an innovative valve for the railway industry and has continued to design and manufacture a world leading range of Safety and Relief valves for Steam Boilers, Compressed Air and non-hazardous Gases. Kunkle produces valves with certification to ASME Section I, Section IV and Section VIII as well as a range of non-code valves.

ELFAB World leading producer of Rupture Discs and Explosion Panels for a diverse range of industries including Oil and Gas, Pharmaceutical, Food & Beverage and Medical. Elfab is also the industry leader for Rupture Disc burst detection systems with ATEX approved devices for the most arduous conditions.

GOETZE German manufacturer of Safety and Relief valves, Overpressure valves, Pressure Reducing valves and Cryogenic service valves. Available with Bellow Seal or Diaphragm for dirty environments. Goetze Brass and Stainless Steel Safety and Relief valves are known for their high discharge rates.

NIEZGODKA A specialist German manufacturer of Safety and Relief valves, Vacuum Relief valves and Pressure Reducing valves with particular excellence in Stainless Steel and exotic materials. Wide range of valves suitable for Food processing, Pharmaceutical production and the Chemical industry.

RITAG World leading German manufacturer of Check Valves (Wafer Lift, Wafer Swing & Duo Check) in Stainless Steel and many exotic materials. Also has a wide selection of speciality valves for in-process sampling suited to Food, Dairy, Chemical and Pharmaceutical industry applications.

VALVE CONCEPTS INC. As part of the US Cashco, Inc. group this specialist division with facilities in both the USA and Europe concentrates on producing Pressure/Vacuum Vents for controlling vapours in tanks where small pressure variations can cause storage tanks to collapse. The VCI product range also includes Pilot Operated Vents, tank Blanketing valves and Deflagration & Detonation Flame Arrestors.

MERCER VALVES INC. Unique patented design of Safety and Relief valves results in a low profile and low weight valve with hemispherical soft seat sealing ensuring bubble tight sealing even after in-process hammering. This US manufacturer excels in the high performance oil and gas industry.

WEATHERCAP Bright Yellow stabilised PVC cover fits on the end of safety valve stacks protecting the valve against the ingress of dust, dirt, rain and nesting birds and will "blow off" when a leakage occurs thus indicating the process plant or valve requires inspection or service. Tethered to the pipe the WeatherCap is never lost and can easily be refitted.

RAINCAP INDUSTRIES Self closing cap suitable for stack venting applications is manufactured in non-sparking Aluminium and guaranteed never to rust or stick closed. Also available with indicator to show a blow-off event has occurred.
